Technology Hardware, Storage & Peripherals

- We reiterate our Strong Buy rating on AAPL as it continues to benefit from strong iPhone demand at higher average selling prices and increasing Services revenue and profitability. AAPL's Services business segment continues to emerge as one of the company's future drivers of growth and profitability, along with its ongoing development of new and fast-growing technologies including autonomous vehicle capabilities, artificial intelligence (AI) applications and artificial reality (AR)/virtual reality (VR) functionality and products. The ongoing expansion of AAPL's ecosystem along with the global growth of iPhone demand, especially in emerging markets with AAPL's ongoing focus of increasing its penetration in India, will continue to drive strong Business Performance trends. AAPL is also committed to completing over \$260 billion in share repurchases by the end of the year which requires an additional open market purchase of \$128 billion. We believe significant upside in the shares exists from current levels and continue to recommend purchase.
- Business Performance continues to accelerate driven by strong iPhone demand at higher average selling prices and significant gains in revenue growth and profitability for Apple Services. For the 12 months ending June 2018, Net Sales Revenue increased 14.78% Y/Y from \$222.78 billion to a record \$255.70 billion. We forecast a further increase of 7% to \$273.46 billion over the NTM. Economic Operating Cash Flow (EBITDAR) increased 15.6% from \$86.3 billion to \$99.78 billion over the LTM. We forecast a further increase of 7% to \$106.49 billion over the NTM. Net Operating Profit After Tax (NOPAT) increased 24.2% Y/Y from \$47.87 billion to \$59.44 billion over the LTM. We forecast a further increase of 5.5% to \$62.7 billion over the NTM. Return on Capital (ROC) increased from 18.41% to 23.08% over the LTM. We forecast a further increase of 25.41% over the NTM. Economic Profit increased 30.60% from \$31.6 billion to \$41.26 billion over the LTM. We forecast a further increase of 10% to \$45.42 billion over the NTM. AAPL's consistent ability to increase Return on Capital and Economic Profit will continue to drive further shareholder value creation.

Apple Inc. (AAPL-US)

## Technology Hardware, Storage & Peripherals

- The iPhone continues to drive AAPL's growth and the expansion of its highly profitable Services business. AAPL reported better-thanexpected Q3 revenue and earnings growth driven by strong gains in iPhone sales at higher-than-expected average selling prices. AAPL reported the sale of 41.3 million iPhones in the guarter which was just below the 41.6 million units expected. However, the biggest surprise came from the gain in average selling price (ASP) of \$724 which was above the \$694 expected. The gain in the iPhone's ASP was important because there were expectations for a decline in the ASP as AAPL continues to raise the retail selling price and bump up against competition from cheaper smartphone offerings. The iPhone's gain in ASP continues to illustrate the strength in pricing power and the strong consumer reception for its products that AAPL receives. Sales of the iPhone X were slow at the beginning of its introduction at the end of last year, but AAPL continued to experience growing demand for the larger screen and increased functionality and features of its flagship and most expensive phone. AAPL also reported another strong quarter for its Services (App Store, Apple Music, Apple Pay, AppleCare, iTunes, and other services) which grew 28% to \$9.34 billion. Services is now expected to exceed a \$40 billion annualized run rate in the next guarter.
- AAPL will introduce its latest lineup of new products at its upcoming event on September 12. This year's new product introduction event is expected to be one AAPL's biggest yet. Expectations are for upgrades to nearly every Apple product line including three new iPhones, a new MacBook air, an updated Mac mini and iPad, and a new Apple Watch. AAPL is expected to announce the launch of three new iPhone models incorporating the edge-to-edge screen design of the current leading iPhone X. The new iPhone models will have a wider range of prices, features and sizes to offer wider appeal. In 2016, Apple reached the milestone of one billion active devices. Currently, that number has grown to 1.3 billion. Expectations are for a new high-end iPhone with a 6.5 inch diagonal display making it the largest iPhone to date. It is also expected to have the ability to view side-by-side content in apps like Mail and Calendar. It is also expected to have a higher resolution OLED display. It is also expected that the new iPhone models will no longer have a home button but will use gesture controls and its Face ID facial recognition to unlock the phone. AAPL is also expected to upgrade its iPad Pro models with higher resolution screens similar to the iPhone X, also incorporating Face ID and gesture controls. AAPL continues to produce a strong cadence of new product introductions and upgrades that drive the steady growth of product sales that further drive the expansion of its ecosystem, and the growth of higher-margin and highly profitable Services content.

August 30, 2018 Page 4 of 12

Apple Inc. (AAPL-US)

## Technology Hardware, Storage & Peripherals

- AAPL continues to develop new AI technologies and AR/VR capabilities for use in existing and future products. AI and AR/VR technologies continue to improve features and capabilities of many of AAPL's products along with the ability to increase security and efficiency and predictive capabilities. Combined with internal development efforts, AAPL continues to make strategic acquisitions of companies with expertise in AI and VR/AR hardware along with 3D gaming and virtual reality software. AAPL introduced its third-party developer ARKit to create AR experiences on its iOS platform. AAPL will continue to develop new products to increase its participation in the fast growing Internet of things (IoT) market of connected and automated devices, appliances and automobiles. AAPL it is expected to introduce its Siri-enabled home audio interface HomePod sometime later this month to compete with Amazon's Echo and Google Home.
- AAPL plans on being a major provider of autonomous and connected vehicle technology. This past summer, AAPL announced its development of self-driving AI technology. Apple recently invested \$1 billion in Chinese ridesharing company Didi Chuxing enabling it to collect data and develop connected car technology while gaining a foothold in the large Chinese ridesharing and automobile market. AAPL also recently received a permit for testing self-driving car technology from the California Department of Motor Vehicles. Self-driving technology has the potential for extremely profitable business for AAPL which will be a component and license supplier.
- AAPL will continue to target emerging markets, specifically China and India for new growth opportunities. China and India represent AAPL's fastest growing markets driven by their growing middle-classes and increasing investment in 4G and 5G networks. AAPL has recently experienced a reacceleration of growth in these countries. AAPL's feature rich products and strong brand equity are enabling it to gain share over lower-priced local product offerings.

Tigress Financial Partners LLC - Member of FINRA / MSRB / SIPC Research: (646) 780-8880 research@tigressfp.com 40 Wall Street New York NY, 10005 (212) 430-8700 www.tigressfinancialpartners.com

Apple Inc. (AAPL-US)

## Technology Hardware, Storage & Peripherals

- AAPL's strong balance sheet and cash flow will continue to fund growth along with enhancing shareholder returns through increasing dividends and share repurchases. AAPL currently has close to \$231 billion, \$47.31 a share, in excess cash. In addition, we forecast that AAPL will generate an additional \$106.5 billion in Economic Operating Cash Flow (EBITDAR) over the NTM enabling it to continue to fund its massive return of capital to shareholders. In May of this year, increased its guarterly dividend 16% from \$0.63 a share to \$0.73 a share which was above its five-year annual average dividend growth rate of 11%. Also, in May, AAPL announced an additional open market purchase for \$100 billion worth of stock which follows previous announcements of the purchase of \$35 billion worth of stock in both 2017 and 2016 and a \$50 billion repurchase announcement in 2015. Since announcing its initial purchase of \$10 billion worth of stock in 2012, AAPL has announced total open market purchases of \$310 billion. So far in 2018, AAPL has repurchased just under \$20 billion worth of stock bringing its total life to date repurchase of shares since 2012 to \$132 billion worth of stock. AAPL currently has open repurchase capacity of \$178 billion. AAPL intends on purchasing another \$128 billion worth of stock by the end of 2018 bringing its total to \$260 billion in repurchases.
- AAPL is on our Research Focus List and in our Focus Opportunity Portfolio. AAPL's strong brand equity, innovative ability, and leading global position together with its powerful cash generating ability will continue to drive greater shareholder value creation.

Tigress Financial Partners LLC - Member of FINRA / MSRB / SIPC Research: (646) 780-8880 research@tigressfp.com 40 Wall Street New York NY, 10005 (212) 430-8700 www.tigressfinancialpartners.com

Apple Inc. (AAPL-US)

## **Technology Hardware, Storage & Peripherals**

#### **Investment Thesis**

Despite its recent gains, AAPL continues to remain and undervalued stock relative to its economic earnings power, brand equity, loyal customer base, cash generation ability, incredibly strong balance sheet, and ability to innovate to create new products as it continues to expand its ecosystem. The ever-growing AAPL user base and ecosystem continues to drive increasing growth in its highly profitable services business. We believe AAPL's ongoing ability to grow the iPhone user base globally along with its ever-expanding ecosystem, which will eventually include the connected home and connected car, together with its ability to continually return large amounts of cash to shareholders and continue to drive greater shareholder value creation.

## **Company Overview**

Apple Inc. (AAPL-US) is the world's leading designer, manufacturer, and marketer of personal computers and mobile communication and media devices, along with related software, services, peripherals, and networking solutions. Apple has also expanded into new markets of connected devices and services that compile its connected ecosystem including the Apple Watch, Apple TV, Apple Music, HomeKit, HealthKit, and CareKit. Apple recently announced the introduction of a Siri-integrated home control interface speaker called HomePod to compete with Amazon's Alexa-based Echo and Google Home. Apple also operates iTunes which is the world's largest application and content distribution and management platform and iCloud which is its cloud storage and computing service. Apple sells its products worldwide through a combination of its retail and online stores along with its direct sales force, retailers, and third-party wholesalers.

Apple reports its revenue by Business Segments including iPhone (62% of revenue), Services which is iTunes and iCloud (13% of revenue), Mac (11% of revenue), iPad (8% of revenue), and Other Products (6% revenue).

Apple also reports its revenue by Geographic Segments including: The United States (37% of revenue), Europe (24% revenue), greater China (20% of revenue), Japan (8% of revenue), Rest of Asia Pacific (7% of revenue) and the Americas (4% of revenue).

#### **Tigress Research Methodology Overview**

We employ proprietary quantitative valuation models combined with dynamic fundamental analysis based on the principles of Economic Profit to formulate timely and insightful investment ratings, analysis, strategies, and recommendations.

We make key adjustments to reported financial data eliminating GAAP-based accounting distortions and measuring all companies on a cash operating basis.

Our proprietary research framework is a multi-factor model that scores and ranks companies based on their risk-adjusted ability to create Economic Profit relative to their current market value focusing on three key components:

Business Performance: Measuring economic profitability, growth and operating efficiency.

Risk: Measuring business sustainability, volatility, strength, and consistency.

Valuation: Linking business performance to market value. Measuring value created relative to capital employed and enterprise multiples of economic profit and cash flow.

We score and rank 24 key measurements of performance, risk, and value into relative market and industry investment recommendations.

For more information on our research methodology, please review the Tigress Investment Research Guide to Company Valuation and Analysis.

#### **Glossary of Key Terms and Measures**

Excess Cash per Share:	Excess Cash per Share is the amount of excess cash divided by basic shares outstanding. Excess Cash consists of all cash and short-term securities less operating cash needed to run the business. Operating Cash is 5% of TTM net sales revenue.
EBITDAR:	Earnings Before Interest, Taxes, Depreciation, Amortization, and Restructuring and Rent Costs. This is especially important when comparing companies that use a significant amount of leased assets like restaurants and retailers.
NOPAT:	Net Operating Profit after Tax represents a company's after-tax cash operating profit excluding financing costs.
Total Invested Capital:	Total Invested Capital the total cash investment that shareholders and debt holders have made during the life of the company.
Return on Capital:	Return on Capital equals NOPAT divided by Total Invested Capital. It is a key measure of operating efficiency. ROC quantifies how well a company generates cash flow relative to the capital invested in its business.
Cost of Capital:	Is the proportionately weighted cost of each category of capital - common equity, preferred equity and debt.
Economic Profit:	Economic Profit is the net operating income after tax less the opportunity cost of the total capital invested. It is the most important driver of shareholder value.
Current Operations Value:	Current Operations Value is the portion of market value based on the discounted present value of the current earnings stream assuming it remains constant forever.
Future Growth Value:	Future Growth Value is the portion of market value based on un-earned Economic Profit

#### **Research Report Disclaimer**

This report is produced for informational purposes only and is not a solicitation to buy or sell any securities or services from any companies or issuers mentioned herein or to participate in any particular trading strategy or in any jurisdiction in which such an offer or solicitation would violate applicable laws or regulations.

Tigress research is distributed in the United States by Tigress Financial Partners LLC a registered broker dealer with the Securities and Exchange Commission (SEC) and a member of the Financial Industry Regulatory Authority (FINRA).

The information contained herein has been obtained or derived from sources believed to be reliable but its accuracy and completeness is not guaranteed and should not be the sole basis for any investment decision but only to be used as a factor in the investment decision process.

This report does not provide individually tailored investment advice and has been prepared without regard to the individual financial circumstances and investment objectives of any person(s) receiving it. The analysis and conclusions herein are not a complete analysis of every material fact respecting any company, industry, or security. The opinions expressed in this report reflect the judgment of the author(s) at this date and are subject to change without further notice. Tigress Financial Partners is under no obligation to provide updates to recipients of any previously issued reports or recommendations.

The market value and expected income from any investment may vary because of changes in interest rates or foreign exchange rates, securities prices or market indexes, operational or financial conditions of the underlying companies or other factors. Past performance is not indicative of future performance. Estimates of future performance, research ratings, and target prices are based on assumptions that may not be realized. Unless otherwise stated, the cover page provides the most recently available closing price on the primary exchange for the subject company's securities/instruments.

Securities are offered through Tigress Financial Partners LLC a SEC Registered Broker Dealer and registered investment advisor and a member of FINRA/MSRB/SIPC which clears its securities transactions and provides custody of client accounts on a fully disclosed basis through Pershing LLC, a subsidiary of The Bank of New York Mellon.

Securities in your account are protected up to \$500,000 of which \$250,000 can be for claims for cash awaiting reinvestment. Please note that SIPC does not protect against loss due to market fluctuation. For additional information, please go to www.sipc.org.

In addition to SIPC protection, Pershing provides Tigress Financial Partners LLC client accounts coverage in excess of SIPC limits from Lloyd's of London, in conjunction with other insurance companies. The excess of SIPC coverage provides an aggregate loss limit of \$1 billion for eligible securities over all client accounts and a per-client loss limit of \$1.9 million for cash awaiting reinvestment within the aggregate loss limit of \$1 billion. The excess of SIPC coverage does not protect against loss due to market fluctuation. For additional information, please go to www.lloyds.com.

Pershing's excess of SIPC coverage is provided by Lloyd's of London in conjunction with XL Specialty Insurance Co., Axis Specialty Europe Ltd., Great Lakes Reinsurance (UK) PLC and Ironshore Specialty Insurance Co.
