NVIDIA Corporation (NVDA-US)

Semiconductors & Semiconductor

- We reiterate our Buy rating on NVDA as 2020 will be a turnaround year with a reacceleration of growth.
- NVDA continues to experience a turnaround in gaming and new data center opportunities, which, together with its penetration of new markets, will drive a reacceleration of Business Performance trends.
- NVDA partners with Tencent to launch START, a cloudbased gaming service in China.
- The increasing adoption of conversational Al will drive NVDA's Hyperscale Data Center growth.
- The Mellanox acquisition increases NVDA's data center capabilities, providing increased speed between GPU processing and network connectivity.
- NVDA's market-leading, high-speed GPUs are driving new market opportunities.
- NVDA's high-speed GPU capabilities are creating revolutionary opportunities in healthcare.
- NVDA continues to experience increasing demand for its industry-leading automotive data processor.
- NVDA's strong balance sheet and cash flow enable it to fund ongoing innovation and strategic acquisitions as well as increasing its return of cash to shareholders.
- NVDA is on our Research Focus List and is in our Focused Opportunity Portfolio.

Tigress Financial Partners seeks to do business with the companies that are the subject of these reports. Please refer to the last three pages of this report for important certification, disclosure and disclaimer Information. © 2020 Tigress Financial Partners LLC. - We reiterate our Buy rating on NVDA as 2020 will be a turnaround year with a reacceleration of growth. NVDA continues to evolve into a platform provider with expertise in graphics processing, computing, and deep learning. GPUs for gaming, artificial intelligence for highperformance computing and cloud data centers, are NVDA's key growth drivers. NVDA is branching out into additional growth channels, including expanded data center capabilities, and into the science and medical fields, which are benefiting from the strength and speed of NVDA's GPUs. NVDA is also experiencing accelerating adoption of its Volta processors and DRIVE PX2 onboard computers for the auto industry. Its recently announced gaming partnership with Tencent (TCEHY-US, Non-Rated) and with Google's (GOOGL-US, Strong Buv-Rated) breakthrough neural network-based processing (NLP) capability called BERT continue to highlight the strength of NVDA's compute capabilities. Contribution from the pending Mellanox acquisition will increase NVDA's data center capabilities and again drive incremental growth. NVDA's leadership position in visual data processing, combined with the acceleration of opportunities in Al and deep learning, and ongoing data center adoption, will continue to drive greater Return on Capital, increasing Economic Profit and greater shareholder value creation. We believe significant upside exists from current levels and continue to recommend purchase.
- NVDA continues to experience a turnaround in gaming and new data center opportunities, which, together with its penetration of new markets, will drive a reacceleration of Business Performance trends. For the 12 months ending October 2019, Net Sales Revenue declined 19.35% Y/Y from \$12.42 billion to \$10.02 billion. We forecast a turnaround with 23.76% growth to \$12.40 billion over the NTM. Economic Operating Cash Flow (EBITDAR) declined 23.86% Y/Y from \$5.19 billion to \$4.51 billion over the LTM. We forecast an increase of 25.57% to \$6.91 billion over the NTM. Net Operating Profit After Tax (NOPAT) declined 47.97% Y/Y from \$4.75 billion to \$2.47 billion over the LTM. We forecast an increase of 39.04% to \$3.44 billion over the NTM. Return on Capital (ROC) declined from 46.20% to 19.33% over the LTM. We forecast a turnaround as Business Performance trends reaccelerate to 24.07% over the NTM. Economic Profit declined 63.70% Y/Y from \$3.74 billion to \$1.36 billion over the LTM. We forecast an increase of 6.52% to \$1.44 billion over the NTM. NVDA's reacceleration of growth, driven particularly by gains in Data Center demand along with other verticals, should provide further upside to our forward-looking expectations.

January 24, 2020 Page 3 of 14

NVIDIA Corporation (NVDA-US)

Semiconductors & Semiconductor

- NVDA partners with Tencent to launch START, a cloud-based gaming service in China. Tencent will use NVDA's GPU technology to power its cloud-based gaming service, which they began testing last year. START enables gamers to access AAA-rated games on low-power devices, such as smartphones and tablets, anytime, anywhere, giving players an experience that is consistent with a traditional gaming console. The combination of Tencent's gaming platform with NVDA's GPU technology will provide a world-class gaming experience. The partnership leverages each company's strengths to create a comprehensive cloud-based gaming service platform. The platform aims to provide significant speed and compatibility, providing gamers access to an extensive library of gaming titles. The partnership will also create an innovation lab focusing on the research and development of video games as well as the potential to integrate AI (Artificial Intelligence) into gaming engine and videogame development. Tencent's START platform is expected to be compatible with Windows and Mac OS for desktops and Android and iOS on mobile platforms.
- The increasing adoption of conversational AI will drive NVDA's Hyperscale Data Center growth. Google's breakthrough neural network-based processing (NLP) capability called BERT (Bidirectional Encoder Representations from Transformers), with its superhuman level of natural language understanding, enables Google's Search function to engage in humanlike dialogue as it captures context and provides intelligent responses that will optimize Google's Search capabilities. The processing demand for neural networks to understand language will drive significant increases in demand for NVDA's GPUs. Large-scale Language Models (LSLM) like BERT, along with GPT-2 (Generative Pretrained Transformer 2) and XL-Net, create a significant opportunity for NVDA's TensorRT GPU that includes a deep learning inference optimizer, delivering low latency and high throughput for deep learning applications with speeds up to 40 times faster than CPU-only platforms.
- The Mellanox acquisition increases NVDA's data center capabilities, providing increased speed between GPU processing and network connectivity. The acquisition will further accelerate NVDA's integration of its GPUs in data centers, driving faster innovation and data processing, as well as the integration of Al capabilities in large databases. Data centers of the future will function as a single giant computer with tens of thousands of computer nodes requiring interconnection to drive parallel processing, thus increasing applications for NVDA's GPUs. The combined company's products are used in all of the industry's leading supercomputers, and both companies supply every major cloud service provider and computer maker.

January 24, 2020 Page 4 of 14

NVIDIA Corporation (NVDA-US)

Semiconductors & Semiconductor

Mellanox is the market share leader in high-performance network connectivity with over 90% share of InfiniBand networking connectivity and over 75% share in Ethernet network adapter cards supporting up to 100GB speeds. The two companies have a long working history. NVDA currently uses Mellanox InfiniBand and Ethernet products in its DGX-2 artificial intelligence computing platform. The merger of the two companies enhances NVDA's ability to combine compute offload/acceleration, which is NVDA's core expertise, with high-speed interconnectivity, which is Mellanox's expertise, to meet the needs of high-performance applications used in AI, machine learning, and data analytics. The long-term synergy of network and GPU architecture is the key driver of the deal and new growth opportunities.

- NVDA's market-leading, high-speed GPUs are driving new market opportunities. As computer interaction continues to become more visual, NVDA's innovative ability and powerful GPUs are continuing to create new growth opportunities. More complex software is, in turn, creating the need for a more sophisticated visual user interface rather than just textual information. The ability of NVDA's GPUs to process visual data is creating new opportunities in desktops, workstations, and data centers along with AI, data mining, and autonomous vehicle applications. The gaming market continues to grow, driven both by increasingly more complex and visually-intensive games and continued growth in the number of gamers, as well as the rapid growth of e-sports as a spectator sport. NVDA's GeForce GPUs are used in many of the leading and largest e-sports tournaments. High-Performance Computing (HPC) and Data Centers will continue to experience tremendous growth as processing demand continues to increase. NVDA consistently launches new products that can process greater amounts of data with lower energy and operating costs. The intense processing power of NVDA's GPUs enables them to handle the increased demands of artificial intelligence (AI) applications.
- NVDA's high-speed GPU capabilities are creating revolutionary opportunities in healthcare. NVDA continues to expand into new industry verticals that are benefiting from its high-speed GPU capabilities. NVDA is partnering with leading medical research providers to create synthetic brain scans to detect brain cancer. Data and medical scientists from NVDA, the Mayo Clinic, and the partnership between Massachusetts General Brigham Hospital and the Women's Hospital Center for Clinical Data Science, are working together using NVDA's GPUs' (Graphical Processing Unit) visual analysis and artificial intelligence (AI) capabilities to create synthetic brain MRI images using Generative Adversarial Networks (GANs) to detect and study brain tumors.

January 24, 2020 Page 5 of 14

NVIDIA Corporation (NVDA-US)

Semiconductors & Semiconductor

GANs are two concurrent AI systems that mirror each other to create synthetic results within a category and identify fake results by working against one another to improve both. It provides similar capabilities to that of a neural network to measure wrong data versus predictive data. NVDA is powering away to generate large data sets for training AI systems to analyze brain tumors. Al can provide a significant number of new capabilities for medical professionals to understand medical imaging better. However, when it comes to studying brain tumors, there is not a large data set of abnormal brain images to use for comparison. New research from NVDA is working to provide a solution to this problem. This research provides an additional facet to its product line and GPU capabilities. The research team uses NVDA's DGX-system with the cuDNN-accelerated PyTorch deep learning framework to train the GAN on data from two publicly-available data sets of brain MRIs - one with images of brains with Alzheimer's disease, and the other with images of brains with tumors.

- NVDA continues to experience increasing demand for its industryleading automotive data processor. NVDA's DRIVE PX2 is the auto industry's most powerful onboard computer enabling in-vehicle AI and driving enhancement technology. DRIVE PX2 is enabling auto manufacturers and component suppliers to accelerate the production of automated and autonomous vehicles. DRIVE PX2 scales from a palmsized, energy-efficient module for AutoCruise capabilities, to a powerful Al supercomputer capable of autonomous driving. NVDA also introduced Xavier, an Al supercomputer chip design for self-driving cars. DRIVE PX2 can process ambient vehicle information and GPS data in real-time to provide autonomous vehicle guidance. It is an extremely advanced self-driving car platform that combines deep learning, sensor fusion, and surround vision. NVDA is currently working with over 300 automakers and tier-one auto parts suppliers to map companies, automotive research institutions, and new and emerging companies working on systems for self-driving automobiles. NVDA's ongoing development of Al capabilities will continue to drive increased market penetration into the automotive industry.
- NVDA's strong balance sheet and cash flow enable it to fund ongoing innovation and strategic acquisitions as well as increasing its return of cash to shareholders. As of October 2019, NVDA has \$9.27 billion, \$15.198 per share, in excess cash. NVDA's excess cash, along with our expected Economic Operating Cash Flow (EBITDAR) generation of \$6.91 billion over the NTM, will enable it to continue to fund R&D and strategic acquisitions. NVDA will continue to enhance shareholder returns through ongoing dividend increases and share repurchases. In FY19, NVDA repurchased \$1.58 billion worth of stock.

January 24, 2020 Page 6 of 14

NVIDIA Corporation (NVDA-US)

Semiconductors & Semiconductor

While so far in FY 2020, NVDA has not repurchased any shares, the company has stated it will resume repurchases once it closes its acquisition of Mellanox, which should happen by the middle of this year.

NVDA is on our Research Focus List and is in our Focused Opportunity Portfolio. NVDA's innovative ability and industry-leading position will continue to increase market penetration in many secular technology trends, including artificial intelligence, autonomous vehicle technology, and emerging opportunities in healthcare, along with increasing graphical and data visualization opportunities and data center growth. Our expectations for 2020, marking a significant turnaround in NVDA's business trends, will create further gains in shareholder value creation.

Investment Thesis

NVDA's dominance in gaming, artificial intelligence, machine learning, data center processing, and autonomous vehicle technology will, along with new areas in science and medicine, continues to drive increasing demand for NVDA's advanced high-speed GPUs. NVDA's emerging applications in key areas of healthcare, such as applying AI analysis for brain scan imaging to create baseline analysis patterns, will create significant future opportunities for its GPUs. NVDA's innovative capabilities and market-leading position will drive new product development and increasing demand for its GPUs, which will continue to drive higher Returns on Capital, increasing Economic Profit, and greater shareholder value creation.

Company Overview

NVIDIA Corp. (NVDA-US) is the world's leading developer of visual computing technologies and the creator of the Graphics Processing Unit (GPU). NVIDIA develops three-dimensional (3D) graphics processors and software for use on visual computing platforms. NVIDIA GPUs enable the conversion of digital data into visual data and also can convert visual data into digital data for a wide range of applications used to generate visually realistic interactive graphics for workstations, personal computers, game consoles, and mobile devices. NVIDIA's processors are used in applications for creating digital content, digital image editing, and industrial applications.

January 24, 2020 Page 7 of 14

NVIDIA Corporation (NVDA-US)

Semiconductors & Semiconductor

NVIDIA's technologies enable visual machine learning that power artificial intelligence (AI) applications such as cryptocurrency mining and autonomous driving. Its GPUs are used in many PCs and gaming consoles. Its GPUs also power applications for autonomous vehicles and deep learning uses in data centers for scientists and researchers.

NVIDIA's customers include all of the major OEMs (Original Equipment Manufacturers) original device manufacturers, system builders, integrated circuits, and add-in board makers, along with electronic distributors and retailers. NVIDIA's GPUs power the world's biggest data center and are used by all of the leading cloud hosting environment operators.

NVIDIA operates and reports revenue in two Business Segments:

Graphics Processing Unit - (87% of revenue) consists primarily of its GeForce line of high-end Graphics Processing Units (GPUs) for use in desktop and portable computers. NVIDIA's GPUs can be part of a video card or can be directly integrated into a computer's motherboard. NVIDIA's GeForce for PC graphics and GeForce NOW line of GPUs for cloud-based computing services and in data centers includes Quadro for desktops and workstations for use in computer-aided design, video editing, and other visual applications. NVIDIA's Tesla and DGX datacenter GPUs are for use by scientists, researchers, and medical applications.

Tegra Processor - (13% of revenue) includes its Tegra line of system-on-a-chip CPUs for use in mobile applications, including mobile gaming and entertainment, as well as autonomous robots, drones, and cars. NVIDIA's Tegra line includes its DRIVE PX2, automotive chip systems that provide self-driving capabilities, and SHIELD, which includes a family of devices and services for cloud-based mobile applications for home entertainment, AI, and gaming. NVIDIA GRID provides virtual desktops.

NVIDIA reports revenue in six Geographic Segments: Taiwan (29% of revenue); China (24% of revenue); Other Asia-Pacific (20% of revenue); United States (13% of revenue); Europe (8% of revenue); and Other Countries (7% of revenue).

Tigress Research Investment Rating Meanings and Distribution

Tigress Research employs a five-tier rating system for evaluating the investment opportunity and potential return associated with owning the common equity of rated firms within our research universe. The potential return is measured on a relative basis to the general market which is represented by the S&P 500 and to the subject company's industry peer group as indicated.

Rating Distribution (01/23/2020)

Relationship

company's industry peer group as indicated.			Companies Under Coverage			Companies Under Coverage*		
Rating:	Meaning:		#	%	#	%		
Strong Buy:	Expect significant price gains in the price of the stock relative to its industry peer group and general market over the next 12 months.		16	13%	1	15%		
Buy:	Expect out-performance for the price of the stock relative to its industry peer group and general market over the next 12 months.		57	47%	5	70%		
Neutral:	Expect little or no outperformance opportunity over the next 12 months.		44	36%	1	15%		
Underperform:	Expect underperformance for the price of the stock relative to its industry peer group and general market over the next 12 months.		5	4%	0	0%		
Sell:	Expect price decline or significant relative market and industry underperformance over the next 12 months.		0	0%	0	0%		
Not Rated	No Current Research Rating		NA	NA	65	NA		
	mpanies under research coverage are companies in which Tigress s LLC or one of its affiliates has received compensation for investment	Total	122	100%	72	100%		

*Relationship Companies under research coverage are companies in which Tigress Financial Partners LLC or one of its affiliates has received compensation for investment banking or non-investment banking services from the company, affiliated entities and / or its employees within the past twelve months or expects to do so within the next three months.

Tigress Research Methodology Overview

We employ proprietary quantitative valuation models combined with dynamic fundamental analysis based on the principles of Economic Profit to formulate timely and insightful investment ratings, analysis, strategies, and recommendations.

We make key adjustments to reported financial data eliminating GAAP-based accounting distortions and measuring all companies on a cash operating basis

Our proprietary research framework is a multi-factor model that scores and ranks companies based on their risk-adjusted ability to create Economic Profit relative to their current market value focusing on three key components:

Business Performance: Measuring economic profitability, growth, and operating efficiency.

Risk: Measuring business sustainability, volatility, strength, and consistency.

Valuation: Linking business performance to market value. Measuring value created relative to capital employed and enterprise multiples of economic profit and cash flow.

We score and rank 24 key measurements of performance, risk, and value into relative market and industry investment recommendations.

Glossary of Key Terms and Measures

Excess Cash per Share: Excess Cash per Share is the amount of excess cash divided by basic shares outstanding. Excess Cash consists of all

cash and short-term securities less operating cash needed to run the business. Operating Cash is 5% of TTM net sales

revenue.

EBITDAR: Earnings Before Interest, Taxes, Depreciation, Amortization, and Restructuring, and Rent Costs. This is especially

important when comparing companies that use a significant amount of leased assets like restaurants and retailers.

NOPAT: Net Operating Profit After Tax represents a company's after-tax cash operating profit excluding financing costs.

Total Invested Capital: Total Invested Capital the total cash investment that shareholders and debt holders have made during the life of the

company.

Return on Capital: Return on Capital equals NOPAT divided by Total Invested Capital. It is a key measure of operating efficiency. ROC

quantifies how well a company generates cash flow relative to the capital invested in its business.

Cost of Capital: Is the proportionately weighted cost of each category of capital – common equity, preferred equity, and debt.

Economic Profit: Economic Profit is the net operating income after tax less the opportunity cost of the total capital invested. It is the most

important driver of shareholder value.

Current Operations Value: Current Operations Value is the portion of market value based on the discounted present value of the current earnings

stream, assuming it remains constant forever.

Future Growth Value: Future Growth Value is the portion of market value based on un-earned Economic Profit

Research Report Disclaimer

This report is produced for informational purposes only and is not a solicitation to buy or sell any securities or services from any companies or issuers mentioned herein or to participate in any particular trading strategy or in any jurisdiction in which such an offer or solicitation would violate applicable laws or regulations.

Tigress research is distributed in the United States by Tigress Financial Partners LLC, a registered broker-dealer with the Securities and Exchange Commission (SEC) and a member of the Financial Industry Regulatory Authority (FINRA).

The information contained herein has been obtained or derived from sources believed to be reliable, but its accuracy and completeness is not guaranteed and should not be the sole basis for any investment decision but only to be used as a factor in the investment decision process.

This report does not provide individually tailored investment advice and has been prepared without regard to the individual financial circumstances and investment objectives of any person(s) receiving it. The analysis and conclusions herein are not a complete analysis of every material fact respecting any company, industry, or security. The opinions expressed in this report reflect the judgment of the author(s) at this date and are subject to change without further notice. Tigress Financial Partners is under no obligation to provide updates to recipients of any previously issued reports or recommendations.

The market value and expected income from any investment may vary because of changes in interest rates or foreign exchange rates, securities prices or market indexes, operational or financial conditions of the underlying companies, or other factors. Past performance is not indicative of future performance. Estimates of future performance, research ratings, and target prices are based on assumptions that may not be realized. Unless otherwise stated, the cover page provides the most recently available closing price on the primary exchange for the subject company's securities/instruments.

Securities are offered through Tigress Financial Partners LLC; an SEC Registered Broker-Dealer and registered investment advisor and a member of FINRA/MSRB/SIPC which clears its securities transactions and provides custody of client accounts on a fully disclosed basis through Pershing LLC, a subsidiary of The Bank of New York Mellon. Securities in your account are protected up to \$500,000, of which \$250,000 can be for claims for cash awaiting reinvestment. Please note that SIPC does not protect against loss due to market fluctuation. For additional information, please go to www.sipc.org.

In addition to SIPC protection, Pershing provides Tigress Financial Partners LLC client accounts coverage in excess of SIPC limits from Lloyd's of London, in conjunction with other insurance companies. The excess of SIPC coverage provides an aggregate loss limit of \$1 billion for eligible securities over all client accounts and a per-client loss limit of \$1.9 million for cash awaiting reinvestment within the aggregate loss limit of \$1 billion. The excess of SIPC coverage does not protect against loss due to market fluctuation. For additional information, please go to www.lloyds.com. Pershing's excess of SIPC coverage is provided by Lloyd's of London in conjunction with XL Specialty Insurance Co., Axis Specialty Europe Ltd., Great Lakes Reinsurance (UK) PLC and Ironshore Specialty Insurance Co.
